Power Protection & Distribution

Potencia Technologies

is pleased to have been chosen as an Authorized Reseller for the supply of power and rack equipment under NER Data Inc.'s LAN Room Racking System RMSO:

E60PS-010053/007/PS

Our partnership with NER Data allows us to offer a comprehensive selection of power and rack solutions for all federal government departments and agencies. Our goal is to provide our customers with the highest quality solutions.

- On the power side this means we will insure your critical systems are protected from power disturbances that can compromise your system availability requirements. We will also provide distribution solutions that will get the power where it is needed.
- On the enclosure side we will insure that our racking systems enable you to create a more effective IT environment. By offering a robust selection of enclosures and options we are able to offer leading edge racking solutions that address the issues like no others - equipment compatibility, cable management, cooling, marking systems for ease of mounting equipment, access control, deployment.

By offering best-of-brand products from a range of manufacturers we are able to insure the highest quality products and support for your computer room needs.

With over 40 years experience in the UPS business, Eaton Powerware has more experience than any other manufacturer in the world. Eaton Powerware offers the widest range of single and three phase power protection products and is known for providing the highest product quality and support available for your critical load requirements.

Server Technology, Inc.

Server Technology, Inc. is a world leading manufacturer of rack power distribution solutions. As a pioneer and leader in the field of remote power management Server Tech products are critical to reducing downtime and improving data center power management.

NER Data is a leader in the design, manufacture, and installation of scalable enclosure systems, media storage racks, IT lab furniture (IQ4), and more. NER products are designed and manufactured to insure the highest quality, technology innovation, and overall value.

Potencia Technologies would welcome the opportunity to speak with you regarding your power and enclosure requirements. Should your requirements go beyond any limitations of this published standing offer, we have other standing offer vehicles at our disposal. We are also able to offer non-standing offer products from world leading manufacturers such as Avocent, RLE Technologies, and QuickScan. Please do not hesitate to contact us at your convenience.
